

# Centre for Neuro Skills

## The Bridge to a Meaningful Recovery

*Given the right therapy by experienced, involved professionals, we believe that survivors of brain injury can regain a normal rhythm of living.*

For more than 35 years, Centre for Neuro Skills has been a world leader in providing intensive community-based rehabilitation for people with brain injuries. Our programs maximize treatment effect in real-world settings, empowering patients to enjoy dignified, productive lives. CNS helps patients regain independence through community re-integration and learning vital life skills that foster self-sufficiency.

For more than 35 years, CNS has provided:

- A home-like environment for relearning activities of daily living
- Goal-oriented programs that foster independence
- Daily schedules that mirror normal routines
- Group events to encourage socialization
- An atmosphere that nurtures family unity
- Measurable, durable outcomes

CNS programs are directed by a clinical staff under the leadership of Dr. Mark J. Ashley, Sc.D., CCC-SLP, CCM, CBIST, founder and CEO of CNS, who has dedicated his career to improving the lives of people with brain injury. Since its inception, CNS has guided thousands of patients on their journey of recovery. Our clinical and residential teams collaborate with physicians, insurers, and families to ensure that mutual goals are met.
